

PERSONNEL PROTECTION SHIELDS

Design, Fabrication & Installation Oversight

Piping Technology & Products, Inc. has pioneered factory-build personnel protection cages for a local refinery. Typically used when insulating the pipeline is not necessary, but operating temperatures require safeguarding personnel from coming into contact with the pipe.

Design

Custom designs, pipe support and product selection, 3D design and modeling, design software integration, company specific drawings, etc.

Fabrication

500+ production workers, 50 welders & fitters, 4 CNC plasma machines, 10 saws, 4 rolls & presses, 1 million lbs. shipped per month, 17k lb. of rapid turnaround.

Installation

PT&P's on-site field service team has over 15 years experience in survey, testing, maintenance, installation and oversight.
